

## Accelerate the Path to Better Results

Welcome to **The Thinking Accelerator™ Featuring HBDIinteractive™**, a next generation learning tool for delivering **Whole Brain® Thinking**. This program will blend online, classroom, webinar, telephone, chat, email, blogs and journal experiences to maximize the participants learning potential. HBDIinteractive™ is an interactive simulation embedded in the Thinking Accelerator™ application.

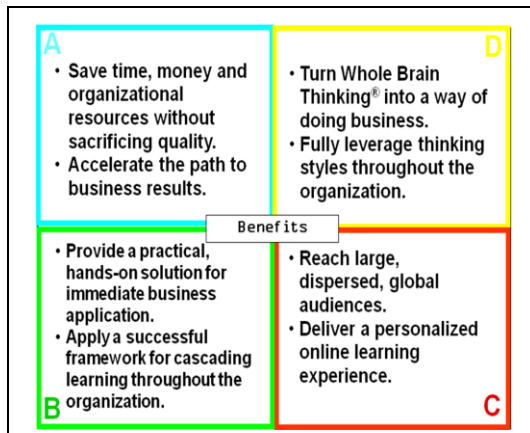

This winning combination provides each participant with a self-paced, on-demand and personalized learning experience which help organizations reach large, dispersed and virtual audiences faster and more efficiently.

**Why is this important?** The pace of change in business and occupational services has never been more rapid or more complex. New challenges are demanding nimbler, more focused decision-making, innovation and leadership capabilities. To stay ahead, organizations need a cost-effective yet high-quality way to get **better results** faster and more consistently across the enterprise. And that requires **better thinking** to keep a competitive advantage.

**What is Herrmann Brain Dominance Instrument®? HBDI®** is a validated, well research thinking styles assessment tool used around the world that asks 120 questions, your answers will provide an accurate view of your preferred modes of thinking, decision making problem solving and showcase your strengths.

The data is important to understand preferred thinking styles and its impact on communicating with interdisciplinary team members. The key is to define your own profile and answer the questions based on how you see yourself and not how others see you at work. This methodology helps individuals learn **"HOW"** to think, which compliment training programs that help them with **"WHAT"** to think.

Discovering how to use your **Whole Brain®** to your **Advantage**, including such critical benefits as:

- Improved problem solving and decision-making
- Rapid individual ramp-up to new responsibilities
- More productive and engaged departmental and cross-functional teams
- Better collaboration, creativity and innovation
